**Balance as of 10/02/ 2004**

**\$5744.47**

I like to thank our 145 current members for their continuous support to MichMATYC and invite you to register (if you have not done so) for the upcoming conference in Grand Rapids and renew your membership at the same time. Inviting colleagues who are not current members to join MichMATYC will definitely strengthen our association by adding variety of expertise and enhancing professional development opportunities. MichMATYC members receive a newsletter 3 times a year, subscribe to an electronic listserv where issues of great importance pertaining to mathematics teaching and learning at the two-year college level are discussed. Members have opportunities of attending or participating in our annual conference and other workshops. Members will also get the opportunity of contributing to our Student Scholarship Award fund. Last year, three students were recognized at the LCC conference as recipients of the award. Because funds are currently available and likely to increase, we ask you to invite students to apply for next year award(s). For more information about upcoming conference or to renew your membership, please visit <http://www.michmatyc.org>

Sam Bazzi  
MichMATYC Secretary / Treasurer
